

**DIAMOND TOOLS  
POWER TOOLS**

**Workdiamond**

# From 1980 to the future

WORKDIAMOND was founded in 1980 by two friends - Gianpietro Renna and Fausto Rebecchi - who worked together and, in just a few years, successfully transformed their small business manufacturing diamond discs into a global entity.

WORKDIAMOND's sales and distribution network currently operates **all over Italy and in fifty countries across five continents**, evidence of an expansion which is the result of the experience, technology and knowledge acquired over many years.

# Cutting, drilling smoothing

With these three separate activities WORKDIAMOND has developed, in over forty years in the business, its ability to manufacture diamond tools using specialist **Italian technology** that is a perfect synthesis of the internal processes of design, assembly, quality control and product testing.

# Solution suitable for every application

With over 2500 items in our catalogue between diamond discs, core drills, grinding stones, abrasive discs for both wet and dry cutting - all conforming to EU safety requirement EN 13236 - WORKDIAMOND offers reliable and innovative solutions for the building, construction and shipbuilding sectors, the marble, granite and natural stones industry, as well as for the thermohydraulic sector.

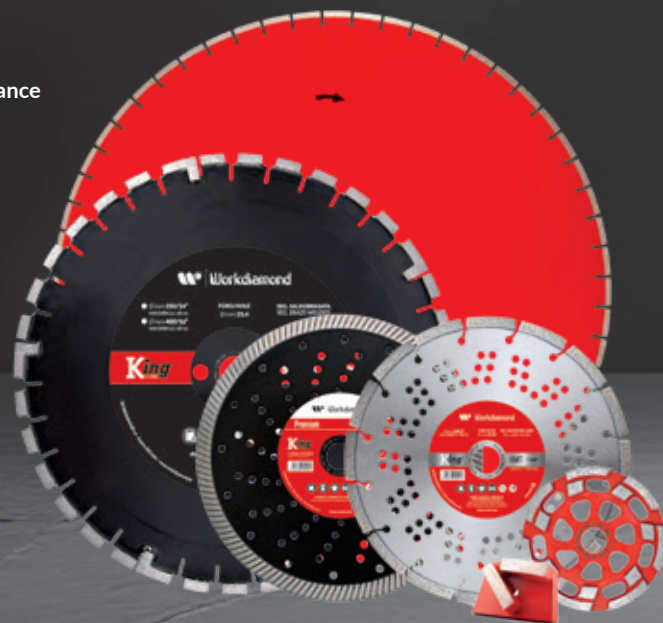

# Product lines

## Premium

High performance  
cutting and  
hard works

**King**  
LINE

## Special

Diamond positioned  
for a faster cut and  
a longer life

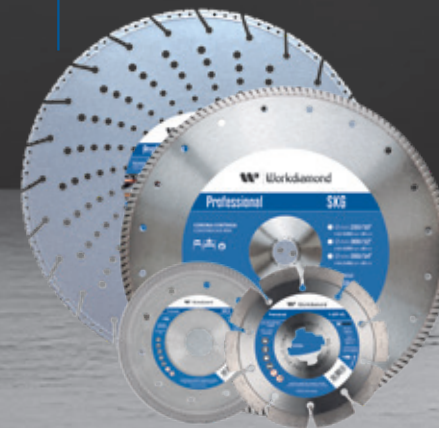

**Queen**  
LINE

## Professional

High efficiency with a  
very good balance  
of speed and duration

## Standard

Good efficiency  
for a generic use

## Basic

Short and  
occasional use

# Product lines

Diamond core drills wet and dry cutting

# The world of power tools

In 2022, WORKDIAMOND expanded its commercial offering by introducing the most innovative **power tools for drilling and grinding**. The range includes everything from handheld core drills to the most advanced models, equipped with **three speeds and micro-percussion technology**. All tools, entirely made in Italy, are available for both **sale and rental**.

MADE IN ITALY

# Welcome to innovation

The power tools with **DPT technology** represent the latest innovation introduced by WORKDIAMOND. The **DPT technology** features a super-fast soft hammering effect while maintaining the segment sharp, free from dust and debris, in all materials and conditions, with top-of-the-market performance for coring in reinforced concrete. These tools offer excellent performance and are market leaders for drilling in reinforced concrete

EXCLUSIVE INNOVATION IN ITALY

MADE IN ITALY

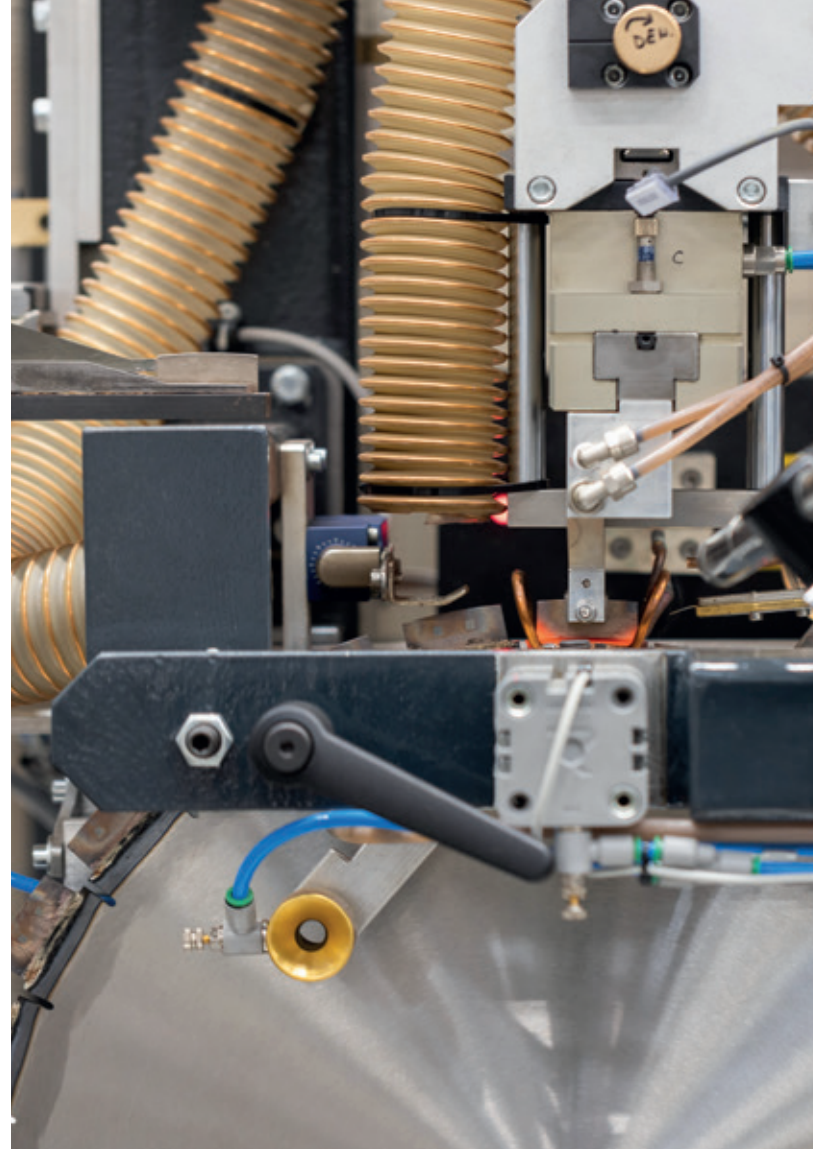

# Tried and tested products

At our WORKDIAMOND workshops we carry out efficiency and resistance tests on the materials and tools we manufacture to ensure the **high quality standards** that have led to increased levels of satisfaction on the part of our customers. Our laboratory tests apply stricter and more stringent enforcement criteria compared with those carried out by the certifying authorities in order to ensure higher quality levels with less bureaucracy. All our WORKDIAMOND tools are **traceable** thanks to an indelible code marked on every piece we manufacture.

# Industry 4.0

Our current WORKDIAMOND production is the result of the most recent technological advancement in the Industry 4.0. sector. We use a range of **digitised procedures** from order processing to designing **new tool models**, to **assembly techniques** to **product storage** in pneumatically operated vertical warehouses. New technologies intended to uphold traditional craftsmanship.

# Tailor-made packaging

Thanks to the **internal graphics-printing department**, Workdiamond has developed an ad hoc packaging line, tailor-made for each tool, with a special consideration for to the environment. A recognizable and consistent image that strengthens the brand of the company.

# Our products your brand

Workdiamond's private label program is designed to meet any need, even for low-volume production. The company offers the possibility of **customizing and branding tools and packaging** with new logos or those proposed by customers.

What can you personalize:

- CUTTING DISK AND CORE DRILLS PACKAGING
- WALL DISPLAY
- COUNTER DISPLAY
- POSTERS AND ROLL UP

# Beyond the catalog

The over 2500 items in our catalogue have provided WORKDIAMOND with the **knowledge** and high-quality **production expertise** to meet each and every customer's specific requirement.

WORKDIAMOND's expert technicians can carry out on-site testing on materials under production in order to design and manufacture "**tailor-made**" diamond tools in **72 hours**.

# Giving new life

WORKDIAMOND, as it always has done, still provides support for the **adjustment, repair, welding, refurbishment and tensioning** of diamond tools, thanks to its technical staff who work 24 hours, 365 days a year, with guaranteed delivery all over the country within 72 hours.

# Work RENT

Workdiamond has recently introduced the **WorkRENT** service, selecting a **package of drilling and grinding solutions** that includes everything needed to offer a complete and efficient rental service. The selected equipment is high-performing and of top quality - entirely **MADE IN ITALY**.

# Sustainability report

We perform **highly digitised** work activities, offering low-impact production while **respecting the environment**, using **recycled and refurbished materials**, supporting **local sporting and social initiatives**. This is what makes WORKDIAMOND unique and sets us apart.
